

Geriative - Covid 19 precautions

The safety of our clients is our highest priority. During the current global pandemic, Geriative has instituted the following measures to help us ensure the continued safety of all clients. These safety measures include:

1. Consistent hand washing upon entering and exiting the premises
2. Face coverings/masks to be worn during sessions unless client requests otherwise
3. Disposable shoe coverings and/or removal of shoes upon client request
4. Personal monitoring of temperature and symptoms to ensure that therapist is not symptomatic during sessions. Note: at the first sign of symptoms, all sessions will be temporarily suspended.
5. Monitoring of symptomatology of all clients with which we engage
6. Periodic Covid19 testing to ensure that therapist is not an asymptomatic carrier of the virus

Clients are free to make additional safety requests as they deem necessary.
